RECYCLE NATURALLY

3 THOUSAND LITRES
PER RETROFIT MODULE

Why retrofit existing STP with
rejuWATER modules?

rejuWATER Module

It works with Sunlight & Soil. Does not use any electricity. Treated water quality improves over time. KSPCB compliant treated water output.

rejuWATER Retrofit

STPs up to 150 KLD can run on just a one-horsepower cutter pump while only requiring one semi-skilled operator. Cut your existing STP operating costs by 90% and increase your treated water reusability by 70%.

Why Choose Us?

Simple to operate. rejuWATER wastewater recycling systems do not need skilled operator. 

Very low OPEX, this system uses almost nil electricity and no consumables are required. 

Very long life and no moving parts means rejuWATER STP are good for very long time. 

Almost nil maintenance. Since there are no moving parts and earth layers inside do not degrade.
